

Swamy Kotagiri was appointed executive vice president of global engineering, research, and development for Cosma International (a Magna International division) in June 2008. Kotagiri has more than 15 years of industry experience, most recently serving as vice president of research and development for Cosma. In that capacity, he was responsible for the development of the company's innovation strategy as well as the launching and execution of new technology in the manufacturing divisions. He served in various positions at Cosma prior to his current role. Before joining Cosma International, he was a structural engineer at General Motors. He has over 12 patents to his credit in automotive product and process design. Kotagiri has a master's degree in mechanical engineering, with specialization in materials and structural engineering, from Oklahoma State University.
