

Doug Szopo is the executive director of global product planning and strategy at the Ford Motor Company and was appointed to this position in February 2007. Szopo was the executive director of the product, manufacturing, and business office for the Americas from March 2003 to February 2007. During his more than 30-year career at the Ford Motor Company, Szopo has held a variety of positions in manufacturing, product engineering and business planning. Most notable of these positions was as plant manager of the Dearborn Engine and Fuel Tank Plant, design manager for the Duratec Engine and pre-program manager for Advanced Powertrain Systems Engineering. Szopo received his bachelor's degree in industrial engineering from Western Michigan University and a master's degree in operations research and industrial engineering from Wayne State University.
