

Brent Yacobucci is a specialist in energy and environmental policy with the Congressional Research Service. He provides research and analysis for members of Congress and their staffs on energy and environmental issues such as climate change policy, biofuels, fuel economy, advanced vehicle technologies and vehicle emissions standards. He has authored reports for Congress and journal articles on topics such as federal biofuels incentives, U.S. climate change legislation, regulation of motor vehicle emissions, and U.S. ethanol imports from Brazil and other countries. Previously, he worked with the U.S. Department of Energy's Federal Energy Technology Center and the Alliance to Save Energy. He was also an intern with the U.S. Embassy in Lomé, Togo. Yacobucci received his bachelor's degree in mechanical engineering from the Georgia Institute of Technology and his master's degree in science, technology and public policy from George Washington University.
