Supervision & Regulation *at the Chicago Fed*

we serve
The Federal Reserve Bank of **Chicago**

Who We Are The Federal Reserve Bank of Chicago supports the Seventh District of the Federal Reserve, our nation's central bank. As part of the Federal Reserve System, the Chicago Fed serves Illinois, Michigan, Indiana, Wisconsin, and Iowa. We succeed through the talents and skills of our high-performing, diverse workforce to fulfill the Fed's mission to foster the stability, integrity, and efficiency of the nation's monetary, financial, and payment systems.

What We Offer We offer a broad range of meaningful career opportunities that serve to challenge and engage our Supervision & Regulation team.

- **Bank Examiners**

Safety & Soundness Bank Examiners work to ensure the nation's banking system operates in a safe and sound manner. Compliance and Community Reinvestment Act Examiners are responsible for enforcing federal consumer protection statutes in financial services.

- **Supervision Analysts**

Supervision Analysts' primary objective is to provide off-site supervisory support to exam staff by researching, analyzing, and reporting on bank performance, market and/or financial data. Analysts also play a critical role in the creation of exam products.

- **Risk Specialists**

Risk Specialists conduct highly detailed analyses of the regional economy, the District's banking sector and the nation's financial system. This provides a horizontal perspective of emerging risks and challenges, and enhances the department's supervisory work.

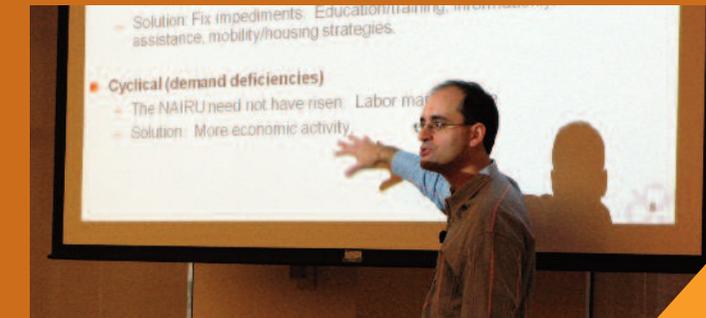

Supervision & Regulation at the Chicago Fed

We are also committed to providing continuous learning. In addition to exceptional training by local and national banking experts, our staff members receive targeted on-the-job opportunities that accelerate technical knowledge and professional development. We also offer tuition reimbursement after the first year on the job and encourage professional certifications in your area of discipline.

What We Look For We seek individuals who hold themselves to the highest standards and flourish in a collaborative and innovative environment. Our most successful employees are creative problem solvers who take initiative over projects. They have solid critical thinking skills and are strong verbal and written communicators.

Successful candidates demonstrate:

- Collaboration skills and willingness to work in a team environment
- Versatility/adaptability – the ability to respond favorably to rapidly changing priorities/directives
- Financial institution and/or audit knowledge – experienced banking or audit professionals preferred with related understanding of accounting, finance and economics
