What is the Midwest Economy Index?

The index is a weighted average of 129 state and regional indicators encompassing the entirety of the five states in the Seventh Federal Reserve District (Illinois, Indiana, Iowa, Michigan, and Wisconsin). The index measures growth in nonfarm business activity based on indicators of four broad sectors of the Midwest economy: 1) manufacturing, 2) construction and mining, 3) services, and 4) consumer spending.

Why are there two index values?

Over long periods, growth in Midwest economic activity has historically tended to coincide with growth in national economic activity. However, over shorter periods of time this has not always been the case. To highlight such differences, we construct two separate index values. The MEI captures both national and regional factors driving Midwest growth, and the relative MEI provides a picture of Midwest growth conditions relative to those of the nation.

What do the index numbers mean?

A zero value for the MEI has been associated with the Midwest economy expanding at its historical trend (average) rate of growth; positive values with above-average growth (in standard deviation units); and negative values with below-average growth. A zero value for the relative MEI has been associated with the Midwest economy growing at a rate historically consistent with the growth of the national economy; positive values with above-average relative growth (in standard deviation units); and negative values with below-average relative growth.

The next MEI will be released:
October 31, 2019
8:30 am Eastern Time
7:30 am Central Time

Midwest Economy Index

Index points to a pickup in Midwest economic growth in August

The Midwest Economy Index (MEI) moved up to -0.26 in August from -0.37 in July. Contributions to the August MEI from three of the four broad sectors of nonfarm business activity and one of the five Seventh Federal Reserve District states increased from July. The relative MEI decreased to -0.27 in August from -0.06 in July. Contributions to the August relative MEI from all four sectors and all five states decreased from July.

MEI and the Seventh Federal Reserve District States

Note: The map's coloring summarizes the most recent contribution to growth in Midwest economic activity from each of the five states in the Seventh Federal Reserve District (Illinois, Indiana, Iowa, Michigan, and Wisconsin).

Sectoral and Geographic Contributions to the MEI and Relative MEI

August 2019

MEI	Illinois	Indiana	Iowa	Michigan	Wisconsin	Regional	
Manufacturing	-0.06	-0.01	0.00	-0.01	-0.04	+0.01	-0.11
Construction	-0.02	-0.01	+0.03	-0.02	0.00	0.00	-0.02
Services	+0.01	-0.07	-0.02	-0.01	-0.02	0.00	-0.11
Consumer	+0.01	-0.01	0.00	-0.01	-0.03	+0.01	-0.02
	-0.06	-0.10	+0.01	-0.04	-0.09	+0.01	-0.26

Relative MEI

	Illinois	Indiana	Iowa	Michigan	Wisconsin	Regional	
Manufacturing	-0.03	-0.01	+0.01	-0.01	-0.03	-0.01	-0.09
Construction	0.00	-0.01	+0.04	-0.01	+0.01	0.00	+0.02
Services	+0.01	-0.12	-0.02	-0.04	-0.03	0.00	-0.20
Consumer	+0.02	-0.01	+0.01	0.00	-0.02	-0.01	0.00
	-0.01	-0.14	+0.04	-0.06	-0.07	-0.02	-0.27

Notes: The table summarizes the most recent contribution to the MEI and relative MEI by sector and geography. The sectoral (rows) and geographic (columns) contributions may not sum to the index in each time period because of rounding. Manufacturing and construction and mining are composed of production and employment indicators. Services contains only employment indicators, while consumer spending contains employment, unemployment, per capita personal income, and home and retail sales indicators.

The manufacturing sector's contribution to the MEI moved up to -0.11 in August from -0.16 in July. The pace of manufacturing activity increased in Iowa and Michigan, but decreased in Indiana and Wisconsin and was unchanged in Illinois. Manufacturing's contribution to the relative MEI fell to -0.09 in August from $+0.09$ in July.

The construction and mining sector's contribution to the MEI was unchanged at -0.02 in August. The pace of construction and mining activity was faster in Iowa and Wisconsin, but slower in Illinois and Michigan and unchanged in Indiana. The contribution from construction and mining to the relative MEI ticked down to $+0.02$ in August from $+0.03$ in July.

The service sector contributed -0.11 to the MEI in August, up from -0.16 in July. The pace of service sector activity was up in Indiana, Iowa, and Wisconsin, but down in Michigan and unchanged in Illinois. The service sector's contribution to the relative MEI ticked down to -0.20 in August from -0.19 in July.

Consumer spending indicators contributed -0.02 to the MEI in August, up slightly from -0.03 in July. Consumer spending indicators were, on balance, up in Illinois, but down in Iowa and Wisconsin and steady in Indiana and Michigan. Consumer spending made a neutral contribution to the relative MEI in August, down from $+0.01$ in July.

Notes: Both the MEI and the CFNAI-MA3 have been standardized to have a zero mean and are expressed in standard deviation units. MEI values greater than zero point to growth in Midwest economic activity above its historical trend, and CFNAI-MA3 values greater than zero point to growth in national economic activity above its historical trend; negative values suggest the opposite. Shading indicates official periods of recession as identified by the National Bureau of Economic Research.

Notes: Both the relative MEI and the CFNAI-MA3 have been standardized to have a zero mean and are expressed in standard deviation units. The relative MEI is constructed from the standardized residuals from linear regressions of each of the 129 MEI indicators on the CFNAI-MA3. Relative MEI values greater than zero point to growth in Midwest economic activity that is higher on average than would historically be suggested based on the CFNAI-MA3; negative values suggest the opposite. Shading indicates official periods of recession as identified by the National Bureau of Economic Research.

2019 MEI Release Dates

<i>Date of Release</i>	<i>Monthly Data for</i>
October 31, 2019	September 2019
December 2, 2019	October 2019
December 31, 2019	November 2019
