

Alisyn Malek is the COO and Co-Founder of May Mobility, Inc. She was formerly the head of the innovation pipeline at General Motors. Prior to that role, she was an investment manager at GM Ventures. There she led investment in the autonomous space, including the early negotiations with Cruise Automation, helping to cement GM's autonomous strategy. She has experience as an automotive engineer, having led a global team to develop advanced charging technology for GM's Spark and Bolt EV products. Malek was recognized as a top ten female innovator to watch by Smithsonian in 2018 and named a top automotive professional under 35 to watch by LinkedIn in 2015 for her work in cutting-edge product development and corporate venture.
