Notes: The early category is defined as when a public health order was implemented before or on March 23, 2020; the mid category, during March 24–28, 2020; and the late category, on or after March 29, 2020. In some instances, local-level public health orders for a large portion of a state’s population were considered to effectively be a state-level order (e.g., St. Louis’s and Kansas City’s public health orders, which preceded Missouri’s order) in the analysis.
